RESEARCH IDENTITY

I identify myself as a positive scholar on negative phenomena. In terms of topics, I study a variety of negative phenomena, or phenomena that people generally have a negative connotation with. Specifically, I study negative behaviors (e.g., gossip, abusive supervision, and ostracism), emotions (e.g., shame and anxiety), and cognitions (e.g., death awareness). My research sheds a positive light on those negative phenomena, with a particular focus on 1) benefits of negative phenomena and 2) mitigators that reduce the harm of negative phenomena.
